

oneSAFE™

SINGLE-GLOVE DISPENSING SYSTEM

A revolutionary
innovation
for increased
food safety.

Smart. Simple.

A first-of-its-kind innovation in the food industry, our new glove dispensing system enables you to provide a higher level of safety to your foodservice operation. Its ease of use can help significantly reduce the risk of cross-contamination, reduce waste and decrease your operation's environmental footprint.

INTRODUCING THE

oneSAFE™

SINGLE-GLOVE
DISPENSING SYSTEM

One glove at a time.

The oneSAFE design makes it easy to grab only one glove at a time and put it on without contaminating other gloves in the box. Because the system allows users to touch the glove only on the cuff, the glove's palm and fingers won't come into contact with the user's bare hands. The unique, single-glove dispensing system also helps reduce the amount of gloves contaminated, dropped and discarded, helping you control costs and run an efficient operation.

Safe.
